

TABLE III-1

## RELATIVE WEIGHTS FOR SITE CRITERIA

Site Criteria  (1)	Weights			
	Sunnyvale Lab		Engine Lab	
	Actual (2)	Adjusted** (3)	Preliminary (4)	"Official" (5)
Site				
Details of Site	-	-	12	12
Climate and Weather	20	17	5	5
Total Site	20	17	17	17
Utilities				
Water	-	-	7	9
Electric Power	10	9	11	10
Flying Field	20	17	9	9
Total Utilities	30	26	27	28
Environment				
Strategic Vulnerability	(15)**	13	17	17
Access to Engine Mfgs.	20	17	17	17
Access to Science Center	-	-	12	11
Proximity to Industry	20	17	10	10
Water and Seaplane Conn.	10	9	-	-
Total Environment	50	56	56	55
Total All Criteria	100	99*	100	100

\*The Adjusted Weights were computed for the purpose of this study only. To avoid the use of decimals all figures are given as whole numbers. As a result the sum of the Adjusted Weights do not add up to exactly 100.

\*\*The Strategic Vulnerability criterion was added late in the Sunnyvale evaluation and no adjustment in the other factors were made to make the weights add up to 100.

Fig. 1. - Map for Rating Strategic Vulnerability

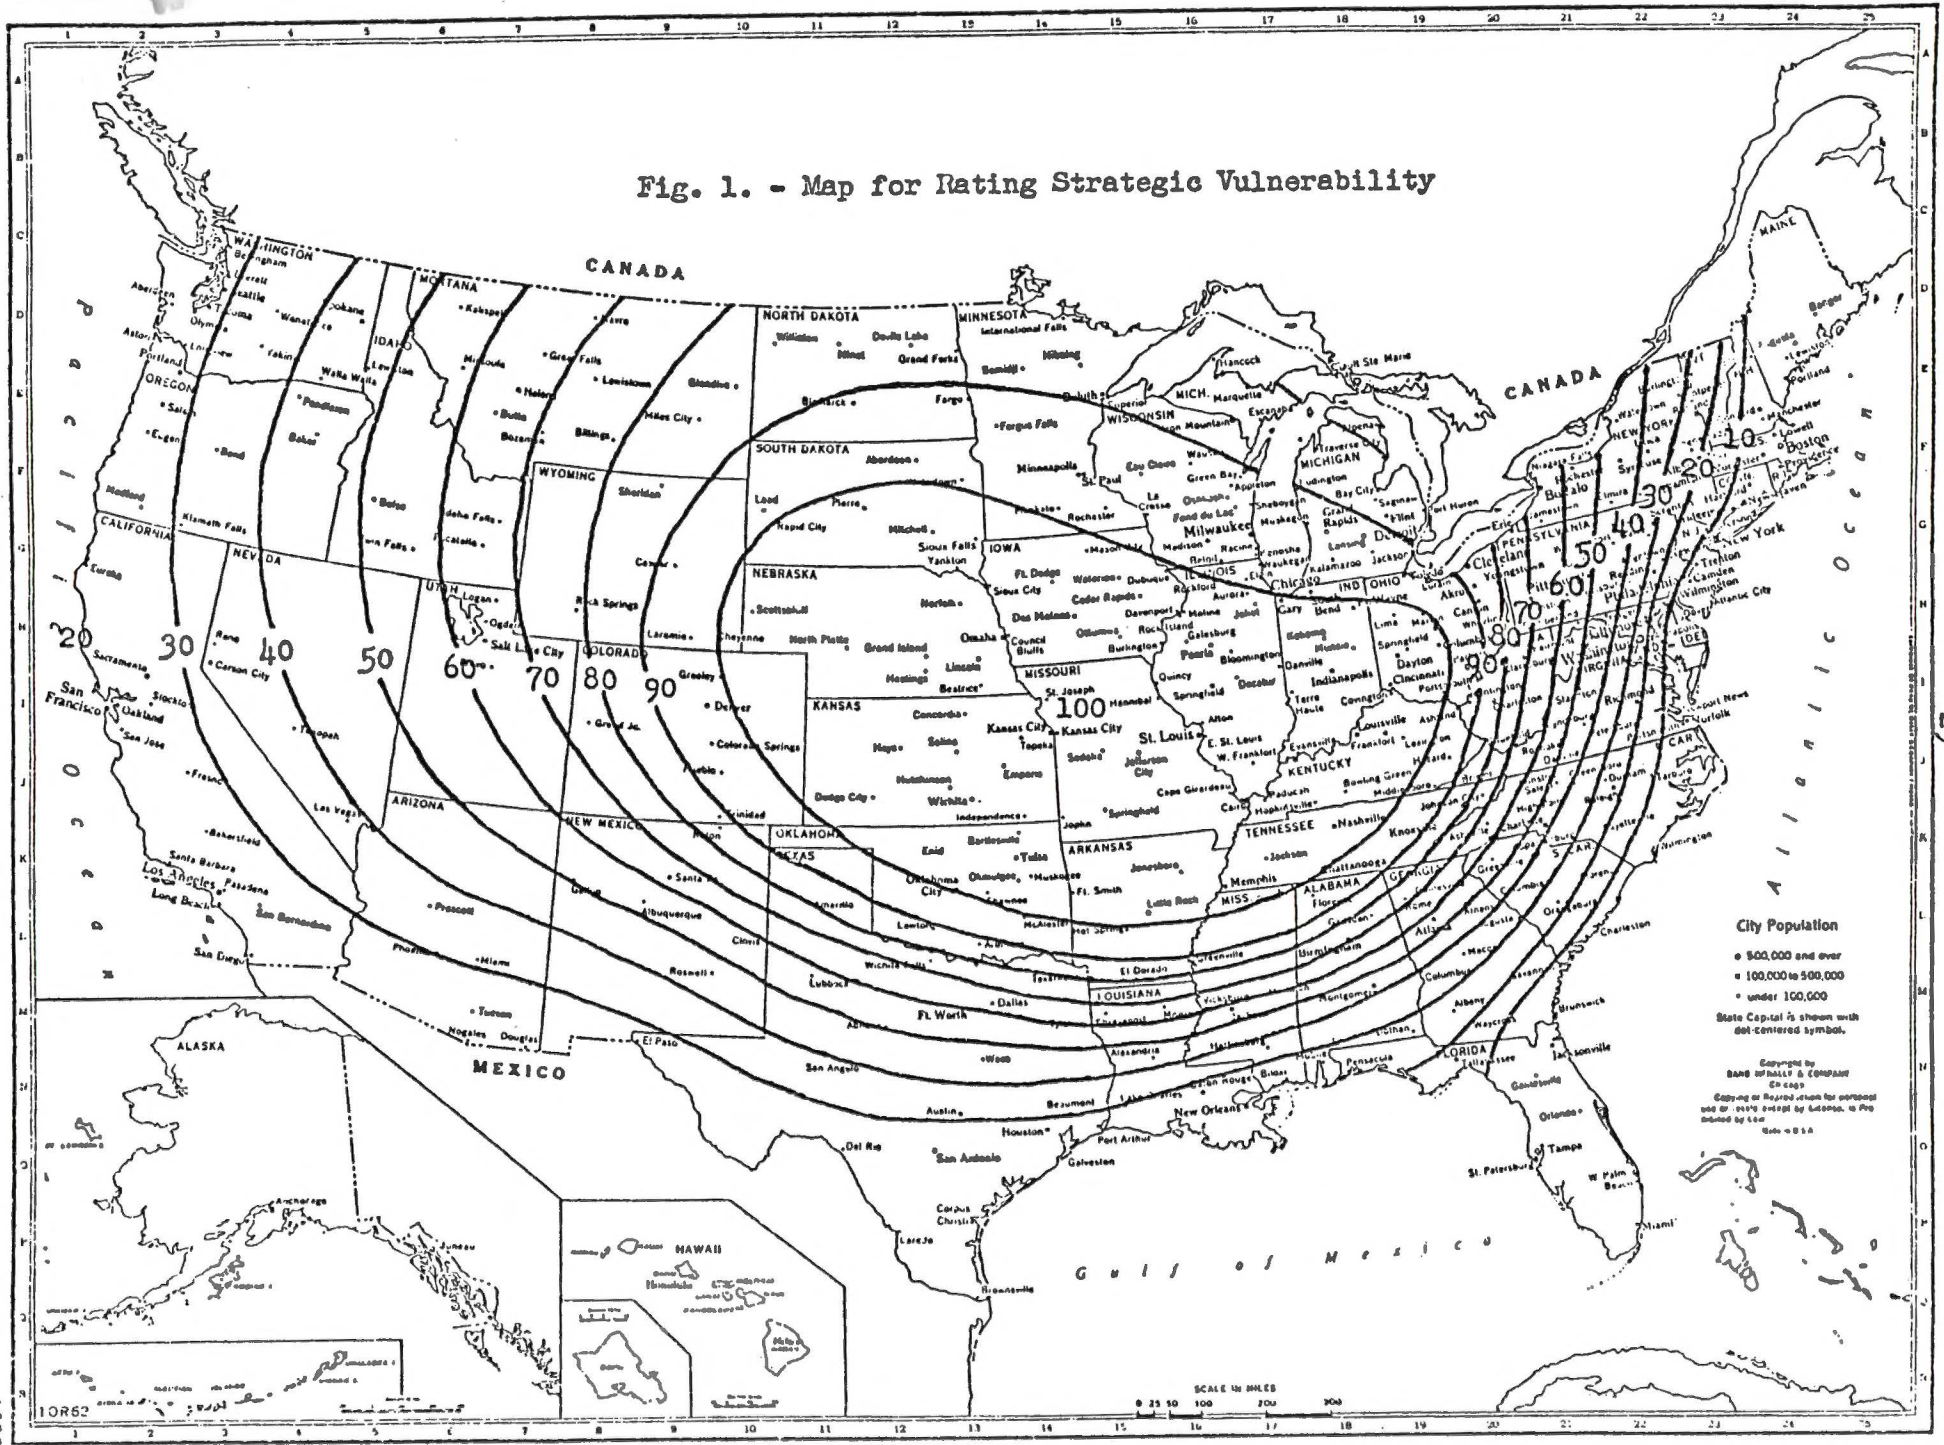

Fig. 2. - Map for Rating Accessibility to Engine Manufacturers
