

April 11, 1973

1010

Dr. Kurt H. Debus
Director
John F. Kennedy Space Center
National Aeronautics and Space Administration
Kennedy Space Center, FL 32899

Dear Kurt:

As you probably know, NASA, at George Low's instigation, plans a series of formal "inspections" of each of the field Centers, in turn, as one way to help review our achievements and program for an influential segment of the public, and Lewis is to lead off. Accordingly, we have set Wednesday, September 19 through Sunday, September 23 as the dates and "Technology in the Service of Man" as the theme for the 1973 Inspection. I cordially invite you to attend the inspection personally; we will send you more details later. I also earnestly solicit your cooperation in order that we can highlight activities from all of NASA and not just Lewis.

Inspection plans call for hosting about 500 invited guests on September 19 to 21 and larger numbers of local public on September 22 and 23. On September 19 to 21, guests will be conducted among 10 tour stops, with approximately 25-minute lecture-demonstrations at 9 of them, as follows (tentative titles):

1. Quieting the Fleet
2. Cleaner Skies
3. Powered Lift
4. Big Boost from Rockets
5. Space Communications Technology
6. Energy for a Better Life
7. Materials for Man
8. The Impact of Wear
9. Servants in Space (Emphasizes ERTS and Skylab-**EREP**)
10. General Assembly and NASA Exhibit Area

The tenth location, our hangar area, will be for general assembly and our main exhibit area; it is here that we want to display representative work and programs from other NASA Centers. In order that your Center

2

be properly represented, will you, by mid-April, please name someone who will be coordinating your Center's participation? Coordinator of this tenth location here is Mr. James Modarelli, Chief of the Management Services Division, FTS network Area Code 216,433-6460.

I am looking forward to your participation and to having you with us this fall.

Best personal regards.

Sincerely yours,

Bruce T. Lundin

Dear Bruce:

I am happy to accept your kind invitation to attend the LeRC inspection September 19-23, 1973. While my schedule will allow only one day for the visit, I plan to bring several KSC managers along because my last visit on a similar occasion was both enlightening and enjoyable.

We will certainly support you with a suitable exhibit. Please have your representative contact Gordon Harris at 305 867-2201 to arrange the details.

I am looking forward to seeing you.

Sincerely,

A handwritten signature in black ink, appearing to read "Kurt H. Debus".

Reference: Your letter of April 11, 1973 (1010)

Since Dr. Pickering is out of the country I am responding to your April letter to him concerning the request for Jet Propulsion Laboratory's participation in Lewis Research Center's September inspection.

We shall be pleased to enter exhibits in your fall special event. JPL coordinator will be Mr. Richard B. Phillips, Manager, Public Affairs Office, FTS network area code 213-354-7006.

I am certain Dr. Pickering will appreciate your personal invitation to him, and will be in touch with you upon his return to Pasadena.

Sincerely yours,

Edwards, CA 93523

Dear Mr. Scherer:

Several days ago, Bruce Lundin wrote you a letter inviting you to attend the inspection of our facilities during the period of September 19-21, 1973 and asking for your assistance in planning exhibits for the event.

We are now completing our invitation list and, of course, we want to invite key staff members from other NASA Centers. Consequently, I would appreciate your sending me a list of names by May 15, 1973 of those of your staff whom you would want included in our invitations. Please give us their titles and mail codes so that our records will be accurate.

We look forward to the receipt of your nominees and having you all with us for the inspection.

Sincerely,

Walter T. Olson
Director, Technology Utilization
and Public Affairs

Dr. Hans Mark
Director
Ames Research Center
National Aeronautics and Space Administration
Moffett Field, CA 94035

Dear Dr. Mark:

Thank you for your letter of May 22 listing key staff members whom you would like on the invitation list for the Lewis Research Center inspection. I think we both recognize that in view of travel funding and the fact that the inspection can only handle about 500 people daily, 38 people would be an unusually large delegation from a NASA Center. Accordingly, I plan to issue invitations to only the following 14 people from your list at the Ames Research Center; that number is more typical of invitations to other Centers.

Steven E. Belsley	Deputy Director of Development	200-18
John W. Boyd	Deputy Director, Aeronautics and Flight Systems	200-3
Louis H. Brennwald	Director of Administration	200-23
Loren G. Bright	Director of Research Support	200-5
Dale L. Compton	Technical Assistant to the Director	200-4
Robert E. Eddy	Deputy Director of Research Support	200-5
John V. Foster	Director of Development	200-18
Glen Goodwin	Director of Astronautics	200-4
Harold P. Klein	Director of Life Sciences	200-7
Dup. Hans Mark	Director	200-1
Stanley A. Miller	Public Affairs Office	204-12
Leonard Roberts	Director, Aeronautics and Flight Systems	200-3
C. A. Syvertson	Deputy Director	200-2
David L. Winter	Deputy Director of Life Sciences	200-7

Recognizing the hazard in protocol by cutting your list, I would be glad to add names that you think I should not have omitted. I certainly don't want any injured feelings.

2

In any case, we will be most pleased to host the people that you determine should come and we look forward to having the Ames delegation here.

Best personal regards,

Sincerely,

Walter T. Olson
Chairman
1973 Lewis Inspection

Dear Dr. Olsen:

In response to your letter of April 19, 1973, attached is a list of key Ames Staff members whom we would like included on the invitation list to attend the Lewis Research Center Inspection on September 19-21, 1973.

Because of problems with travel funding it may not be possible to send more than a select number from this group. Circumstances in the Fall will determine our actual attendance. In any case, Ames is looking forward to the Lewis Inspection, and we wish you the very best in your plans for that event.

With best regards,

Hans Mark
Director

Dr. Bruce T. Lundin
Director
Lewis Research Center
Cleveland, Ohio 44135

Dear Bruce:

My people tell me we are pretty well squared away on the plans for the "Servants in Space" exhibits for the September 19-23 inspection.

You asked for a list of possible invitees. While it is difficult to anticipate meetings and schedules so far in advance, I have attached a list of Goddard's top staff. It is assumed that if they cannot make it, substitutions will be allowed.

Good luck on a good show. Don't set too high a standard. Remember, we have to follow your act.

Sincerely,

A handwritten signature in blue ink, appearing to read "John", is written above the typed name.
