*JHW*

Dear Ray:

It developed that I was away from the office following my visit to your Laboratory two weeks ago last Friday.

Again I want you to know how very much I appreciated the opportunity to make the trip. It was one of the finest experiences I have ever had.

There was one unanimous reaction of everyone with whom I talked, and that was that the taxpayer's money was well used. It was the further opinion that there should never be any question about requisitions for further funds to expand the very essential work that is being carried on in the N.A.C.A. activities.

The trip was extremely well organized and the staff made a very fine impression.

You have my congratulations for a most profitable day in every way.

Very sincerely,

*John H. Weeks*

Dear Mr. Sharp:

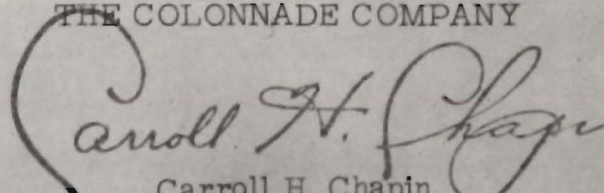

It was a treat, indeed, to attend the Triennial Inspection of the Lewis Flight Propulsion Laboratory.

The inspection was most interesting and the Laboratory itself a credit to you all.

On behalf of Mr. Roberts, Mr. Goff and myself, I wish to extend a special thank you to you for a very pleasant day.

Yours truly,

THE COLONNADE COMPANY

Lakewood 7, Ohio  
June 15, 1954

Dr. Edward Sharp  
N. A. C. A. Laboratory  
21000 Brook Park Road  
Cleveland 11, Ohio

Dear Dr. Sharp:

May I tell you what a delightful and interesting time I enjoyed at the 1954 Testimonial inspection of the Laboratory.

Everything seemed to roll along just as if it were on a production line. I never saw so many people so well handled.

It was a real privilege to have all the scientific techniques explained so thoroughly to the many people. I should like to estimate that there were about 70% of the people that did not understand thoroughly beforehand about these techniques, but with the final outcome everyone like myself went away feeling they had accomplished a world of knowledge in our ever-growing air power.

It was very nice of you to include me and I appreciate more than I can tell you as I enjoyed every minute of it.

Sincerely,

Arlene Davis

STATE ROAD ASHTABULA, OHIO

June 7, 1954

Mr. C. W. Weiss  
9068 Newkirk Drive  
Parma Heights 29, Ohio

Dear Cal:

Thanks again for your consideration in having my name included for the N.A.C.A. inspection tour.

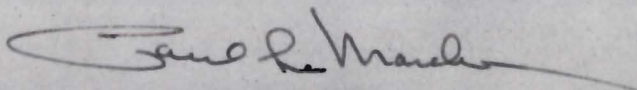

I thoroughly enjoyed the entire day which was both interesting and educational. I was particularly impressed by the high caliber of the personnel we met who, without exception, appeared to be extremely competent in their various lines of work. You can indeed be proud to be part of such an organization and I hope that you will pass along my appreciation of the day's events to your various associates.

I had an opportunity to hear the comments of a large number of the other visitors in our particular group, including several of the congressmen, and they were all unanimous in their opinion that N.A.C.A. is doing an outstanding job.

I was glad to hear that you and Marilyn and Carol Ann are enjoying life in Cleveland. Becky and I hope that you will stop by and say hello whenever you are again in Ashtabula. Just look for the little green house diagonally across from the new water tower and we will be there sitting in the back yard.

Very best regards.

Sincerely,

P. J. La Marche

C & T

The visit to the Lewis Propulsion Laboratory was well worth while. It was one of the finest shows of that character I have ever seen, and most instructive to anyone interested in jet engines. They showed some very advanced work on compressors, primary burners and after burners. They also showed a demonstration of a reverse thrust jet application. I believe it is the first time a plane in this country ever actually went backwards by reverse jet thrust.

I believe the entire organization is to be highly complimented on the show. They had some very high Air Force representatives including General Whalen, Commander of the Tactical Air Command; General Powers of Research & Development; and a number of admirals attending.

Dr. Sharp, Director of Lewis Propulsion Laboratory personally handled the reception of the guests and did a most splendid job! I believe that it would be very advantageous if some of the top AMC officials could visit Lewis Propulsion Laboratory and actually see what they are doing there and why.

ALBERT M. HIGLEY

2036 EAST 22ND STREET  
CLEVELAND

June 7, 1954

Dear Ray:

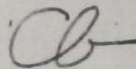

I want to congratulate you on the effectiveness of the Lewis Inspection on June 4th.

The tour was most impressive and extremely well done. Each time I take the tour, I come away with a new respect for the problems facing your organization and the way they are being met.

Thank you for allowing me to bring Neil Carothers along with me. Neil has been with the Atomic Energy Commission for the past six years. He told me that the Commission's laboratories and plants could learn a great deal about tours and program presentations from your group.

If we can be of help to you in any way, let us know.

Yours truly,

Dr. Edward R. Sharp, Director  
Lewis Flight Propulsion Laboratory  
National Advisory Committee for Aeronautics  
21000 Brookpark Road

June 9, 1954

Mr. Edward R. Sharp, Director  
Lewis Flight Propulsion Laboratories  
Cleveland Municipal Airport  
Cleveland, Ohio

Dear Mr. Sharp:

We would like to take this opportunity to express to you and your staff the sincere thanks for the invitation extended to visit and examine the facilities installed and the opportunity of hearing at first hand the experimentation which is taking place at your laboratory in the field of aviation research.

It is amazing to a layman such as I to observe in a period of three short years what distinct progress has been made. The interval may seem more significant to us outsiders than it would to you who are working at these problems from day to day, just as one watches his own child grow up not realizing that he has taken on stature in the interim.

The excellence of the presentations, the orderliness of facilities, the preciseness of arrangements all add up to what we feel is a very significant contribution to our National effort in this very important field.

Thank you again.

Very truly yours,

*R. Markham*

VICE PRESIDENT

June 15, 1954

My dear Mr. Sharp:

Just a note to thank you and your staff for the many courtesies you made available to me upon the occasion of your Open House Wednesday, June 2. I consider myself most fortunate to be numbered among your guests at the instance of Mr. C. R. Yates of your Washington Office, and I feel abundantly rewarded for having taken the time out of my schedule to visit your facility.

Quite apart from the technical aspects of your work and your presentation, I should like to compliment you and your associates upon the excellent job performed by your staff in the physical handling of your guests and the presentation of the material. Being not without experience in this field, I can particularly appreciate what these efforts mean. Also, as one who has a number of engineers under his direction, I would say to you that in my opinion the quality of the personnel you showed to us was outstanding and for myself I am frankly envious of you in this regard.

Cordially yours,

Dear Walt:

Let me add my letter to the many you will receive by way of thanks and congratulations. I genuinely appreciated the invitation to visit your open house at Lewis Laboratory. It was highly entertaining and most instructive.

I also wish to congratulate you on the precision manner in which this presentation was put on. The preparation of the text matter, the coaching of the speakers, the planning of the illustrative and exhibit material, and the cuing of their showing was done to a perfection I have never before witnessed. Many things went into your show that possibly some of the visitors did not realize. The many inconspicuous things, such as special service, facilities, the transportation arrangement, and the work of many of those behind the scenes operating as a team to make a smooth-running day, all took careful planning and untold amounts of patience and imagination. To you and all the others who participated, I take off my hat.

Best personal regards,

# AVIATION WEEK

THE MAGAZINE OF AVIATION BUSINESS

116.1-64

PLEASE ADDRESS YOUR REPLY TO  
NATIONAL PRESS BLDG., WASHINGTON 4, D. C.  
NATIONAL 3414

A MCGRAW-HILL PUBLICATION  
330 WEST 42ND ST., NEW YORK 18, N. Y.

June 8, 1954

Dr. E. R. Sharp  
Director, Lewis Flight Propulsion Laboratory  
N A C A  
21000 Brookpark Road  
Cleveland, Ohio

Dear Ray:

On behalf of myself, Dave Anderton, our engineering editor, and Irv Stone, our technical editor, I want to thank you for the fine cooperation and hospitality extended by you and your staff on the occasion of the recent inspection.

It was the first time we have turned out three senior AVIATION WEEK editors for an NACA inspection and we feel that our efforts were well rewarded because we all got a valuable technical background that will help us to understand the news in the engine field for several years to come, and in addition, we gathered eight separate stories that will run in early issues of AVIATION WEEK.

I have been attending NACA inspections for nine years and I think your Cleveland show topped them all on two points: first, amount of solid technical meat in the presentations; second, in the extremely effective methods of presentation.

Sincerely,

*Bob Hotz*  
Robert Hotz,  
Executive Editor

FRANK J. SARGENT  
MANAGER OF SALES

June 4, 1954

Dear Mr. Sharp:

Yesterday was a wonderful day at NACA Lewis Laboratory, and I am deeply appreciative of having had the opportunity of participating in it. The inspection was very well organized and executed, and I am sure that it was enjoyed by everyone.

I was especially impressed with the scope and quality of the work and with the obvious competence of the personnel. I agree heartily with the Editorial in the Plain Dealer this morning when they make the point that cost should be no consideration considering the accomplishments.

Thank you again for a wonderful experience.

Cordially yours,

*F. J. Sargent*

Cleveland 11, Ohio

116-1-64

Dear Dr. Sharp:

I wish to thank you for your kind information and the privilege of attending the Lewis Inspection last week.

The inspection of the laboratory proved not only highly interesting, but actually informative and instructive. Some of the points of interest should prove useful to us here in connection with our own study of air flow.

I feel that you and your staff should be highly complimented for the fine organization of the inspection, and your complete success in making your visitors feel at home.

I sincerely hope that I may have the pleasure of seeing you again at your next Triennial Inspection.

Best personal regards.

Cordially yours,

VIKING AIR CONDITIONING

FIRST IN RUBBER

AKRON, OHIO

June 9, 1954

116-1-64

Mr. Edward R. Sharp, Director  
Lewis Flight Propulsion Laboratory  
National Advisory Committee for Aeronautics  
21000 Brookpark Road  
Cleveland 11, Ohio

Dear Sir:

This is to express my appreciation and thanks for the privilege of attending the 1954 Triennial Inspection of the NACA Lewis Flight Propulsion Laboratory on June 3, 1954. Our Mr. J. E. Gulick, who was also invited, expresses his regret at being unable to attend.

It was impressive to see the excellent equipment, to learn of the various problems that must be faced and, which is probably most important, to realize that this work is in the hands of capable personnel. We, in the airplane tire manufacturing field, are also faced with unusual new problems and are working to solve them as part of a big team whose aim is to keep America on top.

It would be an oversight not to comment on the efficient manner in which the inspection was handled thereby making possible so large a coverage in a short time.

Very truly yours,

THE B. F. GOODRICH COMPANY

Cleveland Municipal Airport  
Cleveland, Ohio

Dear Dr. Sharp:

I am writing to say many thanks on behalf of our organization, Mr. John Graham and myself for a most interesting day spent at your lab during your inspection.

Mr. Graham was particularly pleased to note several American Steel & Wire cable reels in evidence at some of your various construction projects, to which I remarked it was certainly nice of them to set the reels out during our visit. Seriously, we enjoyed a very profitable visit and my thanks again for your splendid hospitality.

Yours truly,

Dear Dr. Sharp:

Let me take this opportunity to congratulate you and your staff for an outstanding performance on NACA's 1954 Inspection held at the Lewis Flight Propulsion Laboratory. The demonstrations were thought provoking and impressive. We would like to return real soon to get into the details of many of the items that were presented.

We hope that you can find time very shortly to visit us in Boston and see some of the new things that are going on in our own new Small Aircraft Engine Department.

Of course I hope to have the opportunity to attend similar NACA Inspections in the future.

Very truly yours,

*Edward Woll*

Dear Ray:

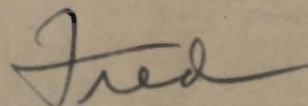

Just a note to express my sincere appreciation for your kind invitation to attend the 1954 Triennial Inspection of the Laboratory last Friday. While I knew the tour would be most informative and enjoyable, I must confess that it exceeded my expectations.

You and your staff are to be congratulated on the splendid work you are doing at the lab. It is comforting to know that this phase of the security of our nation is vested in such capable hands.

Let me say, too, that every detail which could contribute to the comfort and pleasure of your guests was beautifully handled. Having had considerable experience with visitations, open houses and the like, I have a very real sense of appreciation for the detailed planning required to make them tick.

It was nice to see you and Mrs. Sharp again. Have a good time on your trip to the West Coast and set aside some time out of it for a well-deserved rest.

Cordially yours,

Lewis Flight Propulsion Laboratory  
21000 Brookpark Road  
Cleveland, Ohio

Dear Miss Sullivan:

Friday, June 4th will long be remembered as one of the most interesting and educational days I have experienced in years. NACA is certainly a fabulous place.

Although I have been there twice before I had no idea of the enormous scope and diversity of its facilities. I am sure you must be happy to be associated with such an excellent organization, in fact I would like it myself.

I had the opportunity of personally complimenting Mr. Hunter on the splendid job he did in organizing the demonstrations, agenda and countless details necessary to the success of such an affair.

It was unfortunate I did not have more time to thank you for obtaining invitations for us. However, I hope our next meeting will be less hurried by the demands of keeping the "gold" bus on schedule.

Thank you again for being such a gracious hostess and making possible a most enjoyable day.

Cordially,

FULLER & SMITH & ROSS INC.

Cleveland 11, Ohio

Attention: Edward R. Sharp.

Dear Sir:

I am taking this opportunity to thank you for the wonderful privilege extended to me to go thru and view the installations of your vast institution.

One can look with awe and wonder, What God hath wrought, and to hear your Engineers in their respective categories explain in mathematical terms, which, to my mind goes far beyond anything taught in our Colleges, is something I will long remember.

Thanking you again, I am,

Very sincerely yours,

Stanley E. Shupp  
Stanley E. Shupp, Mayor  
Parkview Village  
Your neighbor across the Valley
