

NASA Langley Research Center (LaRC)

SMALL BUSINESS MARKETING GUIDE

September 2024

INTRODUCTION

The NASA Langley Research Center (LaRC) Small Business Marketing Guide serves as a comprehensive resource designed to acquaint small businesses with the LaRC marketplace and provide valuable insights for those seeking procurement opportunities. This guide is packed with essential marketing information to help businesses navigate the LaRC marketplace effectively, including details on NASA small business initiatives, prime contractor contacts, technical advisors, procurement tools, and more. It's your go-to source for accessing everything you need to know about marketing your products and services to LaRC and its prime contractors. For personalized assistance on leveraging this guide for your marketing endeavors, reach out to the LaRC Small Business Specialist at larc-smallbusiness@mail.nasa.gov today.

1.0 LaRC AT A GLANCE

NASA Langley Research Center (LaRC), located in Hampton, Virginia, USA, near the Chesapeake Bay and adjacent to Langley Air Force Base, stands as the oldest of NASA's field centers. Its rich history begins with aviation, as it was founded in 1917 as the first field laboratory of the National Advisory Committee for Aeronautics (NACA), NASA's predecessor. During those early years, LaRC engineers pushed the boundaries of flight, solidifying America's position as a global aviation leader. Notably, the Mercury 7—the original NASA astronauts—trained here, and Katherine Johnson's mathematical prowess contributed to the success of early space missions.

Today, LaRC remains a hub of innovation. Spread across 190 buildings and 764 acres, it houses labs, workshops, wind tunnels, clean rooms, flight simulators, and testing facilities. The center's success hinges on its dedicated workforce: approximately **3,500 engineers, scientists, technicians, and support staff** collaborate to drive research excellence and improve lives. LaRC's contributions extend to NASA's missions, with a focus on **Science, Aeronautics, Space Exploration**, and **STEM Engagement**.

Science: Langley scientists, in collaboration with their partners, delve into Earth's atmosphere, studying how our planet absorbs and reflects sunlight—a process that shapes weather and climate. From ground-based observations to satellite missions, Langley researchers keep a vigilant eye on Earth's vital signs. Whether soaring through clouds over the Atlantic Ocean or hurtling through space in low Earth orbit, NASA technology enhances our understanding of the world. At Langley, these dedicated researchers connect the dots, revealing the intricate workings of Earth's atmospheric and energy systems and their impact on weather and climate.

Aeronautics: Langley researchers play a pivotal role in ushering in an exciting new era of aviation—faster, safer, more sustainable, and more accessible. They innovate by developing and testing ideas for novel vehicles and systems, while also seeking ways to enhance existing ones. Through their work, NASA contributes to greener aviation and opens pathways for a fresh era of flight, complete with new vehicles, markets, and possibilities.

Space Exploration: In preparation for NASA's ambitious missions to the Moon and beyond, Langley's researchers are dedicated to finding and testing solutions that enhance human exploration. Our engineers and technicians are at the forefront, developing and testing the essential technological components for deep space missions. Their groundbreaking work paves the way for successful human exploration of our solar system. Langley's contributions to NASA's space missions are extensive and diverse, spanning from leading expertise in crucial flight phases like Entry, Descent, and Landing, to conceptualizing future missions, and

pioneering the development of cutting-edge sensors to ensure the safe landing of astronauts on other worlds.

STEM Engagement: At Langley, we are committed to expanding the horizons of youth through STEM engagement. We achieve this by sharing our discoveries, supporting teachers, and offering students firsthand experiences of our center's work. Passion for science, flight, and exploration permeates every level of Langley, from the director's office to the fabrication shop floor. Our STEM Engagement team continuously seeks innovative ways to connect with young people from all walks of life, with a special focus on those in underserved communities. At Langley, the enthusiasm for STEM is boundless, and we encourage everyone to work hard and dream big.

To learn more about NASA Langley Research Center and its mission, please go to <https://www.nasa.gov/langley/>.

3.0 LaRC PRIME CONTRACTORS

The LaRC Prime Contractor List is a valuable marketing resource for businesses seeking subcontracting opportunities with LaRC's major small and large business prime contractors. These contractors, listed on the LaRC Prime Contractor List, provide services for LaRC programs and projects. Leveraging the contacts available at each prime contractor location will significantly improve a business's ability to market itself for subcontracting opportunities at LaRC.

4.0 LaRC REPETITIVE REQUIREMENTS

4.1 INTRODUCTION

The LaRC Repetitive Requirements List compiles recurring LaRC services. This information is invaluable for businesses interested in monitoring upcoming acquisitions and seeking procurement opportunities at LaRC. The list organizes requirements chronologically by the period of performance (POP) expiration date.

4.2 LaRC Prime Contract Portfolio

Note: NAICS codes listed for each requirement were used in past competitions and may vary in future competitions. Additionally, competitions may change based on outcomes of market research.

Ultimate Contract End Date	Incumbent	Contract Number	NAICS Code	Potential Value	Previous Competition
Grounds Maintenance and Pest Control Support Services – Scope of services includes mowing grass; edging; tree and shrub pruning; tree and stump removal; ditch, catch basin; weeding; mulching; leaf gathering; fertilization; collection and disposal of trash; vegetation cutting and removal; under brushing; excavation; street sweeping; animal control; snow/ice removal; sidewalk and driveway treatment for winter conditions; debris and grounds cleanup after storm events and the collection and disposal of material; emergency services for Center grounds.					
09/30/24	Alutiiq Career Ventures LLC	80LARC24PA008	561730	\$1M	8(a) non-comp
Aerospace Modeling and Simulation (SimLabs) III - Task order under Ames Research Center (ARC) contract (80ARC018D0008) for systems engineering; software development and systems administration; aerospace engineering and applications programming; graphics programming; simulator hardware and mechanical systems engineering and operations; safety and mission assurance; configuration management; outreach and subject matter expert recruitment; and related contract management functions.					

10/31/24	Metis Flight Research Associates LLC Contact: Fred Miandoab farid.h.miandoab@nasa.gov 757-864-9188	80LARC21F0130	541330	\$20M	SB Set Aside
Geospatial Support Services (GSS) 2 - Task order under GSA FSS (Professional Services/IT Solutions) contract to provide geospatial support and services to NASA Langley Research Center and Johnson Space Center.					
11/30/24	Genex Systems Contact: Shannon Foxx Day shannon.m.foxxday@nasa.gov 757-864-1895	80LARC21F0001	541330	\$9M	SB Set Aside
NASA-wide Specialized Engineering, Evaluation and Test Services (NSEETS) – Task orders under the NEETS contracts (80GSFC19D0011) to provide on/off-site project independent multidisciplinary engineering services, testing, consulting, contractor-on-site monitoring, and evaluation of project and/or programs.					
09/30/28	The Aerospace Corporation Contact: Judy Link judy.a.link@aero.org 703-300-4723	80GSFC19D0011	541715	Varies	Sole source
Environmental Support Services (ESS) - Task orders under the NASA Environmental and Medical Contract (NEMCON) (80KSC020D0023) to provide environmental management, environmental health, and medical services.					
09/30/26	Herndon Solutions Group (HSG) Contact: Tonya Kiefer tonya.r.kiefer@nasa.gov 757-864-8757	80KSC020D0023	541620	Varies	SB Set Aside
Security and Protective Services - Task orders under the NASA Protective Services (Eastern Region) contract (80GSFC23DA004) to provide protective services including but not only: Communication Security (COMSEC); Security Operations (SECOPS); Information Security (INFOSEC); Program Security (SAP and SCI); Resource Protection; Physical Security (PHYSEC); Credentialing; 911 Phone Center and Protective Services Communications Center (PSCC); Emergency Management (EM); NASA Protective Services Training.

5.0 LaRC TOP NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS) CODES UTILIZED (FY2023)

The North American Industry Classification System (NAICS) codes, along with corresponding size standards, are assigned to every item or service procured by the Federal Government. This is done to establish competition parameters for setting aside acquisitions for small business participation, as well as to determine business classifications for all types of businesses competing in full and open competitions. The table below presents a list of the primary NAICS codes utilized at ITPO. You can find the relevant Small Business Administration (SBA) Size Standard for each NAICS at <https://www.sba.gov/document/support-table-size-standards>.

CODE	TITLE
541715	Research and Development in the Physical, Engineering, and Life Sciences (except Nanotechnology and Biotechnology)
561210	Facilities Support Services
541712	Research and Development in the Physical, Engineering, and Life Sciences (except Biotechnology)
541611	Administrative Management and General Management Consulting Services
236210	Industrial Building Construction
221118	Other Electric Power Generation
541330	Engineering Services
541690	Other Scientific and Technical Consulting Services
561612	Security Guards and Patrol Services
488190	Other Support Activities for Air Transportation
541614	Process, Physical Distribution, and Logistics Consulting Services
336413	Other Aircraft Parts and Auxiliary Equipment Manufacturing
236220	Commercial and Institutional Building Construction
541620	Environmental Consulting Services

238210	Electrical Contractors and Other Wiring Installation Contractors
221210	Natural Gas Distribution
561720	Janitorial Services
334511	Search, Detection, Navigation, Guidance, Aeronautical, and Nautical System and Instrument Manufacturing
561730	Landscaping Services
621999	All Other Miscellaneous Ambulatory Health Care Services
325120	Industrial Gas Manufacturing
221310	Water Supply and Irrigation Systems
336412	Aircraft Engine and Engine Parts Manufacturing
332999	All Other Miscellaneous Fabricated Metal Product Manufacturing
334413	Semiconductor and Related Device Manufacturing
325199	All Other Basic Organic Chemical Manufacturing
423510	Metal Service Centers and Other Metal Merchant Wholesalers
541990	All Other Professional, Scientific, and Technical Services
541511	Custom Computer Programming Services

6.0 IDENTIFYING OPPORTUNITIES

6.1 System for Award Management (SAM)

The System for Award Management (SAM.gov) is your gateway to business with the U.S. Government.

- **Free Access:** Use SAM.gov at no cost for all services.
- **Business Registration:** Register your business to become a U.S. Government contractor.
- **Entity Management:** Update, renew, or check your entity's registration status.
- **Record Search:** Look up entity registration and exclusion records.
- **Resource Search:** Find assistance listings, wage determinations, contract opportunities, and contract data reports.
- **Report Submission:** Submit Bio Preferred and Service Contract Reports.
- **Award Data:** Access and analyze publicly available award data.

For all your government contracting needs, visit SAM.gov.

6.2 NASA Active Contract List

The NASA Active Contract Listings (ACL) is a tool for business opportunities.

- **Purpose:** Tracks recurring acquisitions to aid businesses in planning and pursuing future work.
- **Categories:** Organized by NAICS codes into:
 - Accounting & Financial Business Services
 - Administrative Services

- Environmental Services & Remediation
- Facilities Maintenance
- Information Technology
- Multiple Award Construction
- Occupational Health
- Protective Services
- **Benefits:**
 - **Strategic Planning:** Use ACL data on competition type, potential value, and contract end dates to strategize for upcoming bids.
 - **Subcontracting:** Discover subcontracting chances and potential partners for collaboration.

For the latest opportunities and detailed insights, visit NASA's ACL at <https://www.nasa.gov/osbp/active-contract-listings/>.

6.3 NASA Acquisition Forecast

NASA follows a structured policy of preparing an annual forecast and a semiannual update regarding expected contract opportunities for each fiscal year. This forecast consolidates anticipated procurements (above the simplified acquisition threshold) at each NASA Center. Its purpose is to provide industries with advance knowledge of NASA requirements, thereby enhancing competition in the procurement process.

The NASA Acquisition Forecast outlines procurements expected to be solicited in the current fiscal year and beyond, based on the best available information at the time of publication. However, it's important to note that all projected procurements are subject to potential revision or cancellation. Final decisions regarding aspects such as the extent of competition, small or disadvantaged business set-asides, estimated value, etc., will only be made once each procurement is initiated. Therefore, this data is for planning purposes only and does not serve as a presolicitation synopsis, invitation for bid, or request for proposal. Additionally, it does not represent a commitment by the Government to purchase the described supplies and services.

We encourage you to regularly check SAM.gov under Contract Opportunities for the actual notice of pending contract actions.

For the latest NASA Acquisition Forecast, please visit: <https://www.hq.nasa.gov/office/procurement/forecast/>.

6.4 Construction & Architect-Engineering

NASA's Contract Vehicles for Construction and Repairs

- **Large-Scale Projects:** For projects over \$1 million and repairs exceeding \$10 million:
 - **Northeast Regional MACC:** Handled by Glenn Research Center. Contact: Robert Spangler (robert.t.spangler@nasa.gov).
 - **Southeast Regional MACC II:** Managed by Stennis Space Center. Contact: Charles Heim (Charles.j.heim@nasa.gov).
 - **Western Regional MACC:** Overseen by Armstrong Flight Research Center. Contact: Cacie Carrillo-Ferreya (cacie.carrillo-ferreyra-1@nasa.gov).
 - **Wallops MACC II:** Administered by Wallops Flight Facility. Contact: Devona Jackson (devona.s.jackson@nasa.gov).
- **Mid-Scale Projects:** Construction between the Simplified Acquisition Threshold and \$5 million is reserved for the 8(a) program, using the above MACC vehicles.
- **Maintenance and Engineering:** NASA LaRC's CMOE contract is with Jacobs Technology. For subcontracting, contact Dorian Derse.
- **New Constructions:** Typically procured through the US Army Corps of Engineers or GSA's Public Building Service.

NASA Contract Vehicles for A-E Services

- **Scope:** For A-E services not linked to environmental remediation, with projects over \$1 million and repairs above \$10 million.
- **Contract Vehicles:**
 - **Northeast Regional A-E Services:** Managed by Glenn Research Center. Contact: **Jamahel Fayall** (jamahel.r.fayall@nasa.gov).
 - **Southeast Regional A-E Services:** Handled by Kennedy Space Center. Contact: **Amber Lampe** (amber.d.lampe@nasa.gov).
 - **Real Property Master Planning (RPMP):** Administered by Stennis Space Center. Contact: **Adrienne Ragan** (adrienne.peyton.ragan@nasa.gov).

6.5 NASA Small Business Innovation Research (SBIR)/Small Business Technology Transfer (STTR) Program (<https://sbir.nasa.gov/>) and Strategic Partnerships.

The NASA SBIR/STTR program offers funding opportunities for the research, development, and demonstration of innovative technologies that align with NASA's needs, as outlined in annual solicitations. These technologies hold significant potential for successful commercialization. If you are a small business concern or a non-profit research institution such as a university or research laboratory, we encourage you to consider exploring this program as a potential source of seed funding for your innovations.

A great starting point is to review the research topics outlined in the most recent solicitations, which are available at <https://sbir.nasa.gov/solicitations>. While these

topics may change yearly, they provide valuable insight into NASA's current interests and whether your technology idea or research area aligns with them. For further details, please visit <https://sbir.nasa.gov/>.

The NASA Technology Transfer program plays a vital role in ensuring that innovations developed for exploration and discovery are widely accessible to the public, thereby maximizing national benefit. To explore opportunities within NASA's Technology Transfer program, you can visit <https://technology.nasa.gov/>. Annually, NASA scientists, engineers, and developers create software packages for various purposes, such as managing space missions, testing spacecraft, and analyzing vast amounts of data produced by agency research satellites. As part of the Technology Transfer program, many of these software programs are now available for free download through NASA's Software Catalog. You can explore the catalog online at <http://software.nasa.gov/>.

To learn more about Strategic Partnerships and other non-traditional programs, please visit: <https://www.nasa.gov/partnerships.html>.

6.6. NASA Solicitation and Proposal Integrated Review and Evaluation System (NSPIRES)

Supporting research in science and technology is a cornerstone of NASA's overarching mission. To this end, NASA regularly solicits research proposals across a wide range of science and technology disciplines by issuing various research announcements. These announcements undergo evaluation and selection through a rigorous peer review process.

Researchers contribute significantly to NASA's efforts in achieving national research objectives by submitting proposals and conducting research projects that are awarded funding.

For further details and to explore opportunities to participate in NASA research initiatives, please visit: <https://nspires.nasaprs.com/external/>.

6.7 NASA TechPort

TechPort is a platform designed to showcase NASA's diverse range of active and completed technology projects. The TechPort team collects technology investment data from across the Agency to promote collaboration and partnerships, analyze how NASA addresses mission needs, and provide visualizations of critical technology drivers that inform decision-making processes.

For more information about NASA TechPort, please visit: <https://techport.nasa.gov>.

6.8 NASA Mentor Protégé Program

The NASA Mentor-Protégé Program encourages NASA prime contractors to support eligible protégés. This assistance enhances the protégés' capabilities to fulfill NASA contracts and subcontracts, fosters long-term business relationships between protégés' and NASA prime contractors, and increases the overall number of these entities receiving NASA contract and subcontract awards.

For information about the NASA Mentor-Protégé Program and a list of approved mentors, please visit: <https://www.nasa.gov/osbp/mentor-protege-program>.

7.0 NASA OSBP TOOLS

7.1 NASA OSBP Mobile Application

The NASA OSBP Mobile app is available for both iOS and Android devices. It's designed to be a user-friendly tool for learning how to do business with NASA, providing all the necessary resources conveniently accessible on your smartphone or tablet.

Key features include the ability to easily contact NASA Center Small Business Specialists, view Active Contract Listings, and stay informed about upcoming networking events.

You can download the app from the iTunes App Store or Google Play.

7.2 NASA Vendor Database (NVDB)

The NASA Vendor Database (NVDB) serves the purpose of compiling a comprehensive list of vendors, regardless of size, who are interested in conducting business with NASA. This database is utilized by NASA's Office of Small Business Programs (OSBP) for outreach communications and by the Office of Procurement (OP) for market research and acquisition planning. Additionally, industry members can utilize the database to search for capabilities to support subcontracting opportunities or for networking purposes. Vendors can also include a capability statement and sign up to receive email alerts for NASA procurement notices posted on Sam.gov for contract opportunities.

By registering your business in the NVDB, you express your interest in conducting business with NASA and agree to share key information and capabilities of your business with NASA's OSBP, NASA's OP personnel, and other registered vendors.

To register your business in the NVDB, please visit the following website:
<https://apps.nasa.gov/nvdb/>.

8.0 OUTREACH AND TRAINING

8.1 Outreach

The NASA Office of Small Business Programs (OSBP) is dedicated to promoting small business awareness and participation by employing innovative techniques at nontraditional venues, particularly in geographically targeted areas, to enhance engagement across all categories of small businesses. NASA OSBP engages in both in-person and virtual outreach events.

For updates on upcoming outreach events, please visit the OSBP Outreach Calendar at <https://www.nasa.gov/osbp/osbp-outreach-events/>.

8.2 Training

The NASA Office of Small Business Programs provides a series of webinars offering in-depth training tailored to small businesses. These webinars offer participants the chance to ask questions directly to key points of contact within the Agency.

For information about our upcoming training opportunities, please visit <https://www.nasa.gov/osbp/learning-series>.

9.0 LANGLEY CONTRACTORS STEERING COUNCIL (LCSC)

The NASA Langley Research Center Contractors Steering Council (LCSC) is a group comprised of on- and near-site contractors at LaRC. Established in January 1989, the LCSC offers an informal platform for contractors with an existing business presence at LaRC to network with each other and LaRC leaders, fostering stronger relationships and partnerships. The council serves to facilitate the exchange of timely information and feedback on Center-wide issues and activities of mutual interest, while also acting as a forum for informal communication between LaRC and the local contractor community.

The LCSC convenes on the 3rd Thursday of every month and is open to all interested parties.

If you represent a small business and would like to present a 10-minute capability briefing to the LCSC or seek further information about the group, please visit the LCSC website at <https://www.larccsc.com/> or contact Jenny Monokrousos at jennifer.m.monokrousos@ama-inc.com.
