

OFFICE OF SMALL BUSINESS PROGRAMS at Armstrong Flight Research Center

NASA's Armstrong Flight Research Center (AFRC) in Edwards, CA, engages small businesses through its Office of Small Business Programs (OSBP). The AFRC OSBP is dedicated to providing small enterprises with opportunities to participate in NASA contracts and research projects, particularly in the areas of aeronautics research and flight testing. By offering resources, training, and guidance, the office helps small businesses navigate the procurement process and align their innovative capabilities with NASA's mission needs. This collaboration ensures that small businesses contribute to advancements in aeronautics and aerospace technology, supporting NASA's goals of scientific discovery and technological innovation while fostering economic growth and job creation within the small business sector.

Armstrong Flight Research Center (Edwards, CA 93523-0273)

CENTER MISSION

Armstrong Flight Research Center is advancing aerospace technology and environmental and space science through atmospheric flight. Located at Edwards Air Force Base in California, AFRC conducts flight research and technology integration to revolutionize aviation and pioneer aerospace technology. The Center also supports operations of the International Space Station for NASA.

Advancing technology and science through flight, AFRC validates space exploration concepts and conducts airborne remote sensing and science missions for NASA.
